

Simple  
As  
That.

## A Game-Changing Compliance Management System

Identify and correct compliance issues faster and easier than ever.

## Real-Time Compliance. Automatic Results.

In the ongoing quest to achieve and maintain compliance with EPA and OSHA regulations, you need real-time solutions that your organization can manage on its own, while keeping overhead down and instilling a culture of compliance throughout. Enter Audit**PRO**. Years of consulting experience are instilled in this intuitive, turnkey tool.

*Audit**PRO** combines smart protocols with actionable findings and corrective recommendations, all contained within an easy to use, mobile platform.*

With Audit**PRO**, the results are automatic. Issues are identified through intuitive survey questions and automatically linked to a pre-populated database of reference points. You immediately know the citation, the potential fine value and action steps to resolve any compliance issue identified.

## The Future of Compliance Management, Here Today

- Audit**PRO** is a web-based portal system that enables a comprehensive set of self-directed compliance and reporting activities, ensuring a thorough and accurate audit.
- Audit**PRO** enhances an organization's ability to perform regular, no-cost spot inspections with data collection, reporting, and management capabilities that exceed the capabilities of most (if not all) consulting firms.
- Using such advanced features as handwriting recognition, photo capturing, and intelligent logic, Audit**PRO** instinctively guides you through state-specific OSHA and EPA protocols, regardless of who is executing the audit.
- Audit**PRO** is affordably priced with a low monthly subscription fee, no installation expense, no upfront fees, and no equipment costs required.

## Key Features:

### HARDWARE

All necessary hardware is provided at no cost to you, including tablet computers, charging stations, battery docks, and more.

### NETWORK

AuditPRO hardware connects directly to our proprietary database through any secure channel.

### SOFTWARE

Our proprietary, web-based audit software is pre-loaded and auto-updated to meet frequently changing protocols.

### DATABASE

Custom database collects and sorts the multitude of audit data, linking the results to libraries of regulatory citations and making recommendations based on industry best practices.

### REPOSITORY

AuditPRO subscribers can store relevant documents in a secure online repository. Plus, access professionally-developed, editable policy templates and training plans to fast track your success.

### ISSUE MANAGEMENT

Easily assign compliance-related issues to an unlimited number of users in the AuditPRO system. Users will see only what is assigned to them, and they have the ability to create action plans to resolve each issue. Managers can track progress along the way.

### REPORTING

The results of your audits are delivered real-time through a web-based environmental dashboard, immediately available for review from any device that has internet access.

# An Indispensable Compliance Management Solution for Colleges and Universities:

Audit**PRO** is an ideal, low-cost answer in situations where compliance with EPA, OSHA, and/or fire safety standards is a concern. This web-based platform is the only product in the marketplace offering a campus-centric EPA/OSHA/fire safety automated management and assessment tool (patent pending). In addition to providing staff with easy access to a library of compliance guidelines, Audit**PRO**'s web portal is designed to give senior management real-time, visual dashboard assessments of campus compliance vulnerabilities, identifying the code citation as well as the recommended corrective action for each and every finding within the system.

## How It Works:

1. Audit**PRO** intuitively guides any surveyor through the audit process using our proprietary software on a mobile device, asking only relevant questions based on the answers provided.
2. When an issue is identified, the surveyor is prompted by the program to take a picture and real-time alerts are provided if dangerous conditions are detected.

*The digital camera is automatically tied into the program, no need to keep track of separate files.*

*You can view any images captured during the audit for each issue.*

- At the end of the survey and upon synchronization of the mobile device with our proprietary database the results of the survey and corrective actions are immediately displayed on the online environmental dashboard.

The system displays the regulatory citation for every violation.

The system provides an editable suggested corrective and preventive action for every violation.

See images of violations for each incident.

- From that same dashboard, an account administrator can instantly see a report card of their organization's compliance, displaying summaries of all the issues, categories, potential fines, and locations. These are displayed by priority to help you prioritize corrective actions. The dashboard also keeps a real-time tally of fines avoided year-to-date.

- Administrators can drill down on any element of the charts, assigning specific users to take corrective actions.
- Users of the program are immediately notified of compliance issues assigned to them.

Assign users to correct specific issues. The system sends automatic email notifications to users.

You can drill down on any of the charts to review specific details.

Administrators have the option to edit suggested corrective actions.

Non-admin users see only the calendar and issues assigned to them.

7. Action plans created by the assigned user from the dashboard are tracked to ensure completion.

Assigned users can create Action Plans for each assigned issue.

View calendar and trend charts.

The system includes a deep Repository of OSHA, EPA and Training templates, documents and more.

The system allows you to create, save and share reports.

## Key Benefits

- Affordable monthly pricing with no installation expense, no upfront fees and no equipment costs
- Perform a comprehensive audit with little or no compliance expertise necessary
- Use Audit**PRO** as your EMS or let it work alongside your existing EMS
- Go beyond typical auditing tools to gain both protocols and corrective actions
- Instill a culture of compliance across your organization
- Benefit from a cloud-based subscription tool that costs less than a part-time entry-level employee

*Build and display only the information you need in seconds.  
Recurring reports can be scheduled to automatically  
distribute to an unlimited number of email recipients.*

## Try risk free for 60 days.
