

Reliable, Consistent, & Specific Cell Culture

At Bio-Techne, we appreciate the importance of using optimal reagents at every stage of your culture. We provide research solutions, so you will always achieve the results you need.

Cytokines and Growth Factors You Can Trust

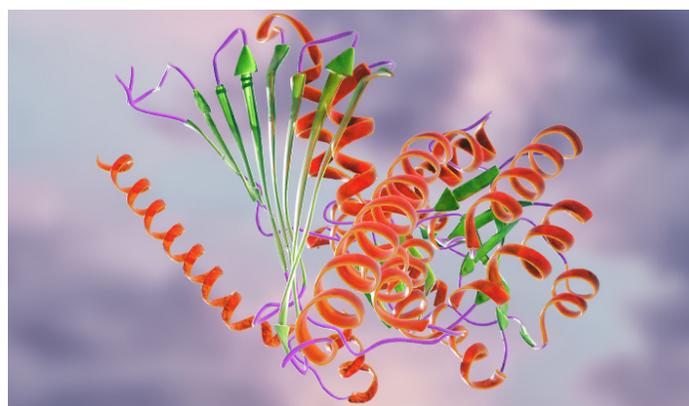

Our purification and production standards ensure we achieve high levels of bioactivity and purity, and lot-to-lot consistency. In addition, we manufacture GMP-grade proteins that come with extensive documentation to provide cell therapy researchers with a consistent, fully transparent, and traceable source of reagents.

Achieve Optimal Cell Growth and Differentiation

We offer serum-free supplements for use in a variety of cell culture systems. Our expert team check each lot for performance consistency, relieving you of unnecessary batch-to-batch screening. Our N21-Max and N2-MAX supplements may be used for stem cell and 3D cell culture, as well as neural and stem cell cultures.

Maintain Differentiated Phenotypes of Cell Cultures

Our Cultrex™ Basement Membrane Extracts (BME) can be used in cell attachment, neurite outgrowth, angiogenesis, *in vitro* cell invasion, and *in vivo* tumorigenicity assays. They play an essential role in tissue organization by influencing cell adhesion, migration, proliferation, and differentiation.
