

SafeMask[®] TailorMade[™]

Procedure Earloop Face
Masks

Personalized fit
means better protection

TailorMade masks fit better to protect better

TailorMade face masks have dual-fit nose and chin pieces that adjust to form a seal around the face and eliminate the gap often created by ordinary masks. Soft, non-woven material provides optimal filtration without compromising breathability. Smooth, stretchy, latex-free, ultrasonically sealed earloops prevent irritation and allow easy removal, reducing risk of self-contamination.

Available
in 2 colours:

Find it at fishersci.com and fishersci.ca

Because a better seal around your face means better protection

FEATURES

BENEFITS

Adjustable nose and chin pieces

Form a seal around the face to reduce gaping
